Communication Policy: Canvas Inbox (Messages) is the single point of contact for this course. Do not email the instructor directly. Ensure your Canvas notifications are enabled so you do not miss critical announcements.

Final Assessment Option: Students who do not wish to complete the final project may opt for a **comprehensive final exam**. This exam must be taken **on campus in the Testing Center** during finals week. Historically, very few students choose this option. **Notification Deadline:** Students must notify the instructor by **Sunday, Nov 15 at 11:59 PM (CT)** to select the comprehensive final exam. If no notification is received, the final project is assumed.

AI Usage Policy (Strict): Artificial intelligence tools (including ChatGPT, Copilot, or automated code generators) are **not permitted** for graded work. Students must use **only the methods and R commands explicitly taught in this course**. Mismatch between written analysis and statistical output will be treated as evidence of academic misconduct.
